MedExpress Urgent Care Provides Treatment for Illness and Injury
A cost-saving and time-saving healthcare alternative

Healthcare is important. As an organization that is dedicated to the safety and health of our employees and their family members, we are pleased to support a business that provides quality healthcare.

MedExpress Urgent Care is the leading provider of full service urgent care in the United States and currently has a total of 77 locations throughout the country. There are 42 locations in Pennsylvania, 14 locations in West Virginia, 14 locations in Florida, 6 locations in Colorado and 1 location in Virginia. Future growth is anticipated around these locations and in additional states.

The success of MedExpress comes from its dedication to provide compassionate patient care in a warm and welcoming environment, and the fact that it provides a much needed service in the healthcare industry. MedExpress is a full-service urgent care facility that treats illness and injury for all ages. No appointments are required - the Centers are open 12 hours a day, every day of the week - and patients can just walk in whenever it is most convenient for them. Most patients are seen and treated in under an hour.

MedExpress facilities provide a comfortable and welcoming environment that maximizes patient flow and efficiency (with multiple check-in stations and a central nurses' station surrounded by multiple exam and treatment rooms) so that patients can be seen and treated in a shorter time period. As a full-service medical facility, there is a physician, registered nurse, X-ray technologist and a team of administrative specialists on site at all times. In addition to private exam and treatment rooms, each Center is equipped for on-site digital X-ray, laboratory work, EKGs, IV therapy, stitches, and splinting. Each MedExpress location also offers workers compensation and occupational medicine services.

With a wide range of services, bridging the gap between true emergency care and preventative primary care, MedExpress is a cost-saving and time-saving alternative that provides patients with a one-stop option for unscheduled, time-sensitive urgent care. Urgent care is defined as the delivery of acute, episodic medical care outside of a hospital emergency department on a walk-in basis without a scheduled appointment. Focused on the treatment of common injuries and illnesses that require timely attention, urgent care provides the convenience of emergency care at approximately ¼ of the cost.

If you require treatment for an urgent illness or injury, your copay and any additional out of pocket costs at MedExpress will be less than that of an emergency department. If you require treatment for a true emergency, one which threatens life or limb, you will need to utilize the emergency department.

MedExpress coordinates patient care with primary care physicians, specialists and emergency departments in order to ensure that patients receive the immediate care they need, in addition to any necessary follow-up care. In doing so, MedExpress both exceeds patient expectations and helps reduce healthcare costs.
